

TEAM PLUSH

SPONSORSHIP PACKAGE

High-School Founders | Inclusive Roster

FOUNDERS MISSION

Ambitious missions always begin with a **simple idea**.

For Team Plush, it began with three high school students who believed that STEM could be more than just innovation, but rather a secondary home where young engineers feel welcomed, supported, and inspired one day at a time.

Team Plush is a newly established FIRST Robotics Competition (FRC) team based out of Ottawa, Ontario. We want to share the equal level of opportunity to youth students across the Ottawa community, where participation is hindered in comparison to established regions like Toronto, California, or New York.

As a first-year team, we invite you to help us write the first chapter of Plush Robotics!! In return, we will provide you with exclusive updates on our build, credit your support on social media, and add your logo on our robot. We need bold pioneering partners like you who believe in hands-on STEM education.

WHAT'S... TEAM PLUSH?

Team Plush is a community **FIRST Robotics Competition (FRC)** team, assembled from a group of passionate high school students building a functioning robot in under 3 months!

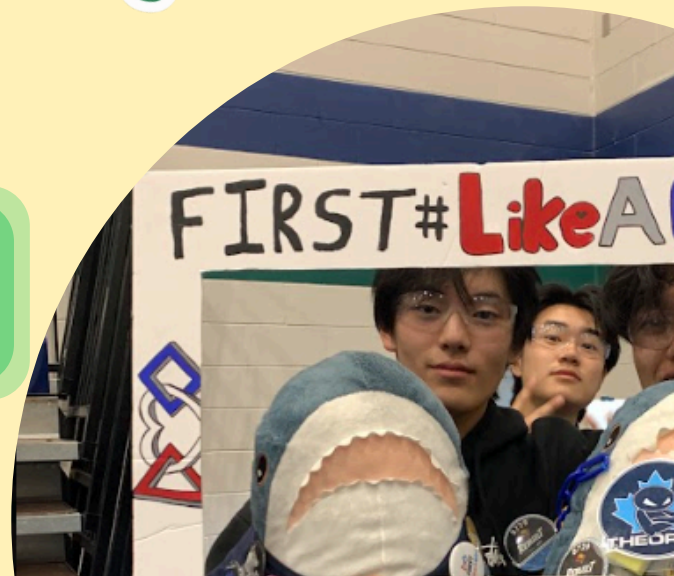

Philosophy to empower students to **design, build, and test physical hardware** without judgement and expert mentorship from industry professionals.

As a **student founded** team in **Ottawa**, **Team Plush** is pioneering locally in Canada's Capital, leaving a trail of future engineers for **years** to come.

Example of High School Robot made in under 3 months!

WHY PARTNER WITH TEAM PLUSH?

1

Talent Pipeline to Young Engineers with Mentorship

2

Direct Youth Engagement in Canadian Tech Industry

3

Community Outreach & Events with YOUR support on Banners

4

Brand Recognition @ Provincials with over 4000 people

TEAM PLUSH '26-'27 VISION
